

CreativeTech is looking for a highly creative Product Designer to join our innovative team in Hamburg. As a Product Designer, you will be responsible for crafting user-centric designs for our new and existing products. You will collaborate with cross-functional teams including developers, product managers, and other designers to ensure that the user experience is seamless, intuitive, and delightful.

Key Responsibilities:

- Design beautiful, user-friendly interfaces for our web and mobile applications.
- Work closely with product teams to understand user needs and translate them into design concepts.
- Create wireframes, prototypes, and high-fidelity mockups that effectively communicate design ideas.
- Conduct user research and usability testing to gather feedback and refine designs.
- Collaborate with developers to ensure accurate implementation of designs.
- Ensure design consistency across all product touchpoints, maintaining high-quality design standards.
- Stay up to date with design trends and emerging tools and technologies to continuously improve our products.

Required Skills:

- Proven experience as a Product Designer, UI/UX Designer, or similar role with a portfolio that demonstrates your design skills.
- Proficiency in design tools such as Figma, Sketch, or Adobe XD.
- Strong understanding of interaction design, visual design, and user research.
- Experience in designing for both web and mobile platforms.
- Ability to create prototypes and conduct user testing.
- Excellent communication skills and a collaborative mindset.
- A passion for solving complex design challenges and improving user experiences.

Nice to Have:

- Experience with motion design or animations.
- Familiarity with design systems and component-based design.
- Knowledge of front-end development or experience working closely with developers.
