At TechX Inc., we are looking for a passionate and skilled Frontend Developer to join our dynamic team in Berlin. You will be responsible for building user interfaces that are not only visually appealing but also functional, responsive, and performant. As a Frontend Developer, you will work closely with UX/UI designers, product managers, and backend developers to create seamless web applications.

Key Responsibilities:

- Develop new user-facing features using React and Redux.
- Build reusable components and front-end libraries for future use.
- Ensure the technical feasibility of UI/UX designs.
- Optimize applications for maximum performance across a vast array of web-capable devices and browsers.
- Collaborate with backend developers to integrate APIs and enhance overall functionality.
- Write clean, scalable, and efficient code.
- Participate in code reviews and team meetings to share knowledge and improve development processes.

Required Skills:

- Proven experience in front-end development using React, HTML5, CSS3, and JavaScript.
- Familiarity with version control tools like Git.
- Understanding of RESTful APIs and asynchronous request handling.
- Experience with responsive design and cross-browser compatibility.
- Strong problem-solving skills and attention to detail.
- Excellent communication skills and the ability to work in a team environment.

Nice to Have:

- Experience with TypeScript and Next.js.
- Knowledge of testing frameworks such as Jest or Mocha.
- Experience with CSS preprocessors like Sass or Less.
